

Notice: Internship opportunities at Insignia for 6th Semester Students

Insignia is a Global leader in cutting-edge technology solutions, business consulting, and digital transformation services. Insignia operates across three countries – the United States, the United Kingdom, and India – and serves a diverse clientele worldwide. Insignia, offers a comprehensive suite of services, including custom software development, data engineering and analytics, cloud deployment and management, cybersecurity and compliance, artificial intelligence and machine learning, UI/UX design, and technology and business consulting.

GEHU has signed an agreement with Insignia to provide our students an opportunity to leverage the capabilities to suit today's industry.

Insignia is offering Internship opportunities to 6th semester students. The students are required to fill the following form immediately. This opportunity will not only provide global exposure, it will also provide a chance to top performers for placement offers. This internship is one of the Department's initiative for the 6th sem compulsory internship component.

<https://insigniaconsultancy.zohorecruit.in/forms/c642ee0830c008a1af67eba7009d241ef42e0c82c68e16ea98cf39e7e31b1301>

- The form should not take more than 5 minutes to complete for students
- It will make it extremely easy for student to make project choices based on their area of interest and level of expertise.
- Students would also need to upload a CV which will help us know their CGPA and class performance.
- **For microservices architecture** based projects, students will work in teams and will concentrate on one of the core areas mentioned in the attached document.
- **For Data Science projects** as well, students will work in teams and will concentrate mostly in Python.
- **For frontend projects**, students will be engaged in User Experience/User Interface design projects. So the team will comprise of both kinds of students who can work in tandem. We will only allocate such projects to exceptional students having some prior experience or good training/certifications.
- **For other topics**, we will only shortlist exceptional students who can be a part of a team.

For any queries you can contact Dr. Satvik Vats, Asst Prof, Dept of CSE who is the SPOC for Insignia-GEHU partnership.
