7 th Sem Cyber Security	Access to internationally renowned EC Council's Computer Hacking Forensic Investigator (CHFI) Version 10 + iLabs + ECC Exam Voucher. Will be informed separately by Prof Saumitro Chattopadhyay	

Apart from the above all Specialization students are provided with unlimited and free access to all Specialization Tracks/Courses/Projects/Certifications of Coursera which is a significant investment on the part of the University. It has however been noticed with great concern that many students are not utilizing the licenses causing unnecessary loses. It is expected that all specialization students have completed atleast 5 certifications each semester. All such students are directed to utilize the licenses to the full extent. (If any specialization student is finding any issues with their Coursera licenses they should contact Prof Nitin Thapliyal.)
